Mobile Applications

IConcepts has the ability of not only complex application development in various platforms. We also have the most talented and skilled people to develop all your mobile application needs. In today's rapid changing world of mobile and tablet technology all businesses must examine this new avenue of sales. We have been developing the applications for our customers to be user friendly and by exploiting this new channel we are increasing your chances to expand your business for this new generation of users. The new generations expectation of the user interface and design is nothing short of the likes of artists, which bring us to importance of why our graphic designers are creative and imaginative. Combining both our technical and artistic skills we can transform your business into a leading edge technology power house that your competitors can only dream of.

3 Easy ways to reach through mobile,

- Apple IOs 4 and up
- Android 2.0 and up
- Window Mobile CE & 7.5

Devices range from mobile phones to tablets

Support all languages

Images, Mapping and GPS System

One area of our core competency is in the area of image capturing and mapping systems.

• The ability to capture photographs and location information on supporting handsets enhances the validity of data collection and, in some cases, opens up a completely new range of possibilities.

• On handsets supporting GPS, includes the geographic position at which each response was captured providing the basis for spatial analysis and input into a GIS system.

Innovative Concepts

Where your dreams become reality
