- ✓ Remote monitoring and management
- ✓ Strong analytical reporting that will improve sales with promotion campaigns
- ✓ Student attendance with biometric attendance update
- ✓ Local support with rapid service turn around

" Premier School Management - Where your school management dreams become reality "

Premier School Management Software

The Premier school management system is the state of the art software package used for managing specialized schools daily needs. The system provides every aspect of what is required to run a world class school. With features that are undeniably unique to our solution, provides the owners a peace of mind while they are relaxing on holiday.

Not all software is created equal. When you have the chance to use the Premier school system, you will experience first hand of what a quality, easy and intuitive system it is to use. At IConcepts, we pride ourselves in providing the user with the best user experience possible.

The Premier system will not only make management of your school easier, but also boost your sales. Utilizing our reporting modules, you will have the ability to see what your areas of strength and weakness are. This allows you to create custom promotion campaigns to help you drive those sales targets. Moreover, the system will provide you ways to monitor your debt collection from you students and help you calculate the commission for your sales staff and payment for your teachers.

The screenshot displays a 'TIMETABLE' report within the Premier software. The report is organized by date (From: 01-Jan-00, To: 15-Jan-00) and lists various classes (e.g., Class A, Class B) with their respective teachers and scheduled times. The interface includes navigation buttons like 'Run Report' and 'Print Report'.

Premier School Management Functions
